

PEST-STOP

Serious about pest control

SX mini smoke

For use against flying and crawling insects such as houseflies, cluster flies, fruit flies, mosquitoes, wasps, moths, fleas, bedbugs, ants, cockroaches and stored product insects including saw-toothed grain beetle and adult grain weevils. For use in domestic situations, public hygiene areas including hospitals (not occupied wards), industrial and municipal buildings and food handling/storage/manufacturing premises. May also be used in zoos, pet shops, kennels, veterinary practices and laboratory animal houses (excluding animal pens and cages). Not for use on grain or in empty grain stores.

Rate of application: Apply at a rate of one generator per: 120m³ for flying insects, 30m³ for fleas and bedbugs, 7.5m³ for ants and cockroaches

Instructions for use: For best results fumigate in the late afternoon and leave the house or building for a minimum period of 2 hours.

1. Consider how many fumers you need for the room to be treated (consult "Rate of application"). Heavy infestations may require more than one application.
2. Clear people and animals including fish from the room before use.
3. Place canister(s) spaced out on the floor surface on a heat resistant surface e.g. a plate on top of a sheet of aluminium foil 50 cm x 50 cm.
4. Make the area to be fumigated as smoke tight as possible by closing all windows etc.
5. Open canister(s) and light the fuse on the canister furthest from your exit point first, then light the next fumer and move towards your exit point. Close the door on exit, it is not necessary to seal the door with tape.
6. Leave for at least 2 hours but preferably overnight and then ventilate the room thoroughly.
7. For severe infestations fumigate 3 times at 5 to 7 day intervals.
8. Disclaimer: The above information is intended to give general health and safety guidance on the storage, transport and use of the product. However, it is not intended to replace the product label and any appropriate technical usage literature available.
